

ambicrete™

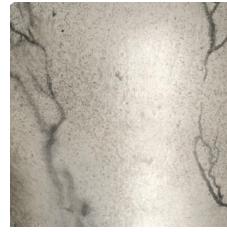

A product by Acoye
Certified Non Combustible

Natural

Granite

Marble

AMBICRETE was designed to address several problems. Primarily the issues caused by working with composite stones through the manufacturing and installation process that has a chance to cause silicosis in the user.

Secondly to address the negative environmental impact man made stones have on the environment. from mining of raw materials, the heavy water consumption used during manufacture and the resins and harmful bonding agents used to create these products.

Lastly we wanted to give consumers a better sustainable circular choice when it came to using composite stone in and around their home and family.
